AirRoof

The only one of its kind in Tasmania. The AirRoof is the perfect solution for areas where heavier structures such as a hoekker marquee just aren't feasible because of time, accessibility or weight restrictions. This structure weighs just 60kg, is laid flat and inflated by our 2 x 1.5hp fans within 30 minutes.

Dimensions are 11m across and 7m deep.

If power is a problem we can supply the generator. For that final touch of distinction when using during the night, we can fit LED lighting inside the walls in colours to match your choice.
